

Functional & Non-Functional Requirements

MIT ACT — Crennotech Group Project (Smart Document Scan AI) · Week 3 · 7 August 2026

Supported import formats

- PDF (text-based)
- Word (.docx)
- Excel (.xlsx)
- Email (body text and/or attachments)
- Image-based / scanned PDF (needs OCR first)

Functional Requirements

ID	Requirement
FR1	System accepts SOW files in the formats listed above
FR2	System extracts all fields listed in the Data-Extraction Field List
FR3	System shows a confidence score for each extracted field
FR4	Staff can review, edit and approve extracted data before it's saved
FR5	System flags fields it could not confidently extract

Non-Functional Requirements

ID	Requirement
NFR1	Extraction results should be ready for review within a few minutes per document
NFR2	System should handle documents up to 20 pages without failing
NFR3	Extracted data must be reviewable by staff before touching live CleanTasker data
NFR4	System should be usable by non-technical CleanTasker staff, not just developers
